BX306 GNSS Kit

TERSUS

With 2W/460MHz Radio

Overview

BX306 Kit consists of BX306 Basic and 2W Radio Option. BX306 GNSS receiver is a cost-efficient GNSS Receiver, which provides cm-level positioning in real time, and accurate raw observation for static post processing and post processing kinematic (PPK).

2W Radio option provides reliable data communications between 457 MHz and 467 MHz for mission-critical applications where a combination of stability, superior performance and long distance are required. The BX306 Kit is ideal for surveying, AGVs, and agricultural applications.
