Ntrip Modem TP688

Industrial Modem for Ntrip Corrections

Overview

The Ntrip Modem TR688 is an industrial modem ideal for Ntrip corrections. It equips built-in industrial 4G wireless communication module, built-in 2600mAh battery, RS232 serial port, mounting handle, SIM card slot and high-speed data transmission module. It is a cost-effective industrial wireless modem.

The TP688 supports Ntrip protocol, and it can be used in Ntrip server mode and Ntrip client mode. The Ntrip function is configured by RS232 serial port and text message.

Key Features

Industrial design and IP67-rated protection

Industrial component ARM and modules

Serial data transfer and wide voltage input

Low power consumption

Long-lasting operation with built-in 2600mAh battery

Supports global 2G/3G/4G network

Supports DNS proxy

Supports NTRIP

Ease of configure, use and maintain

Global Accuracy Easier / Tersus GNSS Inc. / Version V1.2-20200710

Technical Specifications

Performance

| Input Voltage: | 5V~36V DC |
|------------------------------|-----------------|
| Operating Current: | 125mA @ +12V DC |
| Standby Current: | 90mA @ +12V DC |
| Power Consumption (typical): | 1.5W |
| Battery: | 2600 mAh |
| Charging time: | 3.5 hours |
| Operating hours (typical): | 18 hours |

Physical

| Dimension: | 160x102x37 | mm (w/o connectors) |
|-------------------|------------|---------------------|
| Weight: | | 650g |
| Operating Temper | ature: | -40°C ~ +85°C |
| Relative Humidity | • | 95% @ +40°C |

Interfaces

| Serial Port: | RS232 x1 |
|--------------------|---------------|
| Antenna Connector: | SMA Female x1 |
| Power Connector: | 2pin LEMO |

Communication

| Network: | | |
