

Nuwa Version(2.4.8.0) Release

November 5, 2024

Overview

Tersus GNSS Inc. ("Tersus") is glad to release the Nuwa for GNSS receiver. Nuwa version (2.4.8.0) is available to download at www.tersus-gnss.com/software/software and support documents are available at www.tersus-gnss.com/document/software.

Features

- > Assists with Bluetooth/USB connection
- Configure base/rover setup
- Visualized interface for receiver operations
- Data management (import/export)

Change from Previous Versions

Issue	Туре	Version
Added the function of quick code.	Enhancement	
Added code searching by summary.	Enhancement	
Added code color support.	Enhancement	
Added code cloud uploading and downloading.	Enhancement	
Added tilt icon status differentiation display.	Enhancement	
Added selected point connecting to line during line measurement.	Enhancement	
Added stakeout prompt frequency setting.	Enhancement	
Added staking point WGS84 coordinates type.	Enhancement	
Added the setting of whether to display the coordinates when staking.	Enhancement	
Added points cloud measurement mode for visual positioning,	Enhancement	
Added visual positioning tasks management.	Enhancement	2.4.8.0
Added TAP satellites status display.	Enhancement	
Added TAP Fill support.	Enhancement	
Added support for firmware upgrade checking when connecting to Oscar or Luka.	Enhancement	
Added country code and channel selection in WIFI settings.	Enhancement	
Added expire date display for visual positioning and TAP service in device screen.	Enhancement	
Added David30-D connection support.	Enhancement	
Added SHP vector map support.	Enhancement	
Added KLIC vector map layer control and label text display.	Enhancement	

Added .gps format export support.	Enhancement
Added WGS84 coordinate system automatic	Enhancement
changing of the central meridian.	Enhancement
Added Morocco coordinate systems central	F.1
meridian maintenance.	Enhancement
Added coordinate systems for Finland, France.	Enhancement
Updated CRS for South Africa, Malaysia.	Enhancement
Updated German translation.	Enhancement
Improved refresh point database performance.	Bug Fix
Fixed the issue that RW5 export data might be	Due Fiv
in wrong order.	Bug Fix
Fixed the device model issue in RAW export.	Bug Fix
Fixed the issue of not being able to log in when	
the space of cloud account is insufficient.	Bug Fix
Fixed the issues of displaying Feet (US Survey).	Bug Fix
Fixed the issue that low probability of screen	
off may lead to database abnormality, and	Bug Fix
turned on keep screen on by default.	
Adjusted the logic of Base points generating	Dug Fiv
after checking VRS in rover configuration.	Bug Fix
Fixed the issue that TAP satellites map may not	Dug Fiv
be displayed.	Bug Fix
Modified the calculation in Base Shift when	Dug Fiv
selecting basepoint to use ground coordinates.	Bug Fix
Fixed the possible failure when selecting album	Pug Eiv
picture for code scanning registration device.	Bug Fix
Fixed the issue of deformation of scanning	Pug Eiv
QRcode in horizontal screen.	Bug Fix
Optimized the calculation of RMS in tilt survey.	Bug Fix

Fixed the issue of incorrect direction of offset	Bug Fix	
point in tilt offset measurements.	Bug IIX	
Fixed the issue that the database is abnormal	Bug Fix	
and may crash when the code is null.	Bug IIX	
Fixed the issue that the flag is not refreshed	Bug Fix	
after point stakeout in detailed display style.	Bug Tix	
Optimized auto zoom in CAD stakeout.	Bug Fix	
Fixed the issue of antenna and RMS calculation	Bug Fix	
in editing of visual positioning results.	bug rix	
Fixed the issue that the specified target area	Pug Eiv	
cannot be calculated in the area division tool.	Bug Fix	
Fixed the issue of possible calculation error in	Bug Fix	
intersection tool.	bug rix	
Fixed the result points naming issue in line	Bug Fix	
segmentation tool .	Bug Tix	
Added CAD Survey module.	Enhancement	
Added Visual Positioning for Oscar Trek.	Enhancement	
Added code attributes feature.	Enhancement	
Added Internal GPS connection way.	Enhancement	
Added Area Division module.	Enhancement	
Added automatic time zone setting.	Enhancement	
Added project list sorting function.	Enhancement	2.470
Added the display of satellite in used number.	Enhancement	2.4.7.0
Added outputting of RTK status, satellite	Enhancement	
numbers and DOP values in location sharing.	Enhancement	
Added prefix setting in DXF vector map import.	Enhancement	
Added setting of distance decimal display.	Enhancement	
Added one-key deselect all in cloud sync.	Enhancement	
Added base low battery alarm.	Enhancement	

	I
Added repeat measurement and export.	Enhancement
Added acceptance status display of correction	
data via controller network or UHF in Survey	Enhancement
interface.	
Added RTK mode, distance to last, line name in	Enhancement
points detail and exporting.	Emancement
Added setting of displaying survey line detail.	Enhancement
Added support for grid to ground calculation	Fahanaanaat
under Lambert projection.	Enhancement
Updated Dutch and French languages.	Enhancement
Fixed possible crash with David30-TAP.	Bug Fix
Fixed possible incorrect antenna and missing	Dug Eiv
ephemeris in static survey with David30.	Bug Fix
Fixed the issue of successful registration but	Dug Eiv
may prompt an error with David30.	Bug Fix
Optimized Base record, refreshing Base after	Dug Eiv
getting base antenna height.	Bug Fix
Optimized Base record, not repeating the same	Dug Eiv
Base point.	Bug Fix
Fixed the issue of directly overwriting the old	
points when inputting the same name in	Bug Fix
confirmation box in stakeout.	
Fixed the issue that some road LandXML files	Pug Eiv
may fail to be imported.	Bug Fix
Optimized color display in Surface Stakeout.	Bug Fix
Fixed possible issue that Diff Age is shown as	Dug Eiv
99.	Bug Fix
Fixed the issue that the azimuth calculation of	Dug Fiv
incomplete out-clothoid may be wrong.	Bug Fix

Added point list order function.	Enhancement	
Optimized point list display.	Enhancement	
Added support for David30-TAP connection.	Enhancement	
Added support for TAP network mode, and added TAP coordinate conversion.	Enhancement	
Added graphic measurement containing polygons, rectangles, arcs, and circles added in Survey interface.	Enhancement	
Added point name intelligent filling in Survey.	Enhancement	
Added angle display for electronic bubble.	Enhancement	
Added offset measurement mode.	Enhancement	
Added offset item display in Line Stakeout.	Enhancement	
Added TTF font support for CAD Stakeout.	Enhancement	
Added support for importing points with same name.	Enhancement	2.4.6.0
Added support for polygon import in KML KMZ base map.	Enhancement	
Display files according to file format when importing from the cloud.	Enhancement	
Added LandXML road format section data import and section stakeout.	Enhancement	
Added the logic of calculating road stakes by integer miles in Pile point detail.	Enhancement	
Added SP description line to RW5 export.	Enhancement	
Added latitude and longitude dd.mmssss format in Export.	Enhancement	
Added the function of long press TAP key to enter TAP interface on TC80.	Enhancement	
Added SBAS satellites mask.	Enhancement	

Added network module status display in receiver network mode.	Enhancement	
Added external power supply status display.	Enhancement	
Added List mode display of main menu.	Enhancement	
Added the option of left/right side calculation in Two point intersection.	Enhancement	
Updated Portuguese language.	Enhancement	
Modified Philippines, Morocco, Canada coordinate system.	Enhancement	
Added grids and geoids of Belgium, Turkey grid, France and Romania.	Enhancement	
Fixed the issue that KML may fail to import.	Bug Fix	
Fixed the issue that the lines in KML base map may disappear when re-entering interface.	Bug Fix	
Fixed the issue of import failure when the file contains point data with the same name.	Bug Fix	
Fixed the issue that NCN file can't be imported if it contains extra spaces, and adjusted the display of point names in NCN export.	Bug Fix	
Fixed the issue that the related files of SHP file can not be exported to the cloud.	Bug Fix	
Adjusted the antenna height in RW5 export, and record it to the ARP height.	Bug Fix	
Fixed the issue that line breaks lead to display error when exporting CSV.	Bug Fix	
Fixed the issue that RTCM1021-1027 may be calculated incorrectly, and added the mark of elevation application calculation.	Bug Fix	
Fixed the issue of not getting new base after	Bug Fix	

	T	I
modifying base antenna height, and added the		
base change pop-up window in Survey.		
Fixed the issue that the distance to base		
station is not displayed in the location	Bug Fix	
information interface.		
Fixed the issue that averaging in control point		
survey mode may be calculated incorrectly.	Bug Fix	
Fixed the issue that the calculation of forward		
and backward text instructions may be wrong	Bug Fix	
in Line Stakeout.		
Fixed the issue of UCS coordinates and current		
position wrong display in CAD Stakeout.	Bug Fix	
Adjusted the display digits of SN number.	Bug Fix	
Fixed the issue that some configurations of		
NMEA output may not be effective, and added	Bug Fix	
the configuration of NMEA output frequency.		
Fixed the issue that TIN generated for some		
graphs may not be correct in Earthwork.	Bug Fix	
Fixed the issue that the result may be not		
correct when choosing to calculate L from A in	Bug Fix	
Offset Point tool.		
Added the ability to automatically download		
when the coordinate system selected in new	Enhancement	
project contains missing grid and geoid files.		
Added the judgment and pormpt if there are	Enhancement	2450
points with the same name in Point Import.	Enhancement	2.4.5.0
Adjusted the interface of road input and added	Enhancement	
the road preview function.	Liniancement	
Added controller voice broadcast function.	Enhancement	

		I
Added Base info tab page in the location		
screen, displaying information including base	Enhancement	
power, base satellite count and format.		
Added base abnormal movement alert.	Enhancement	
Added the function of measuring when the tilt		
compensation fails but the pole is vertical.	Enhancement	
Added KLIC XML vector map format support	Enhancement	
and related color display.	Enhancement	
When Stakeout prompt type is set to North		
and south direction, adjusted the blue arrow	Enhancement	
to be North-South.		
Added the coordinate display when selecting	Enhancement	
the staking points.	2anocment	
Added the configuration of displaying survey	Enhancement	
and stakout points in the line stakeout screen.	Emandement	
Added the choice of calculating L from A or	Enhancement	
from B in the tool Offset Point From Line.	Emancement	
Added Kazakhstan predefined coordinate		
system, modified Turkey, South Africa	Enhancement	
predefined coordinate system.		
Added Bosnian, updated German.	Enhancement	
Fixed the issue that RTCM1021, 1023, 1025		
check configuration may not be saved.	545 TA	
Fixed the issue that APP shortcut keys on	Bug Fix	
controller may repeatedly start the software.	DUS I IA	
Fixed the issue that the distance calculation to	Bug Fix	
the base may be wrong.	545 TA	
Added support for LUKA connection.	Enhancement	2.4.4.0
Added support for David30-D connection.	Enhancement	2.4.4.0

creating staking lines.		
Fixed the problem that the default export		
·	Pug Fiv	
format could not be separated automatically	Bug Fix	
with Excel in European region.		
Fixed the crash of Azimuth Distance when the	Bug Fix	
angle format is DMS.		
Fixed the problem that opening CAD drawings	Bug Fix	
may fail on Android 11 and above.	248.1	
Fixed the problem that it may take a long time	Bug Fix	
to start the software on Android 11 and above.	dug Fix	
Fixed the problem of incomplete display in	Due Fin	
main page in some languages.	Bug Fix	
Added configuration of projection height	F.1	
parameters.	Enhancement	
Added the function of IMU calibration when	F.1	
connecting Oscar Ultimate.	Enhancement	
Added coordinates display of selecting points		
in CAD Stakeout.	Enhancement	
Added the function of selecting points from		
survey point list and control point list in Point	Enhancement	
Stakeout.		2.3.3.0
Added loc file import function in Site		
Calibration, added selecting points to	Enhancement	
participate in the calculation.		
Added code attribute to control point and		
staking point.	Enhancement	
Added a guide interface when starting the	5.1	
software for the first time.	Enhancement	
Added icon editing mode.	Enhancement	
	1	i

	1	
Improved the speed of online updata, added	Enhancement	
download progress display.		
Updated Spanish, Russian and French.	Enhancement	
Added Tersus Cloud (beta version), including		
the function of one-click synchronization,	Enhancement	
project and data file upload and download.		
Fixed the issue of disconnection when no		
positioning data is received when connecting	Bug Fix	
to Oscar.		
Fixed the issue that the antenna type may be		
deleted abnormally.	Bug Fix	
Fixed the issue that Google online map may		
not be displayed in the Survey and Staekout	Bug Fix	
interface.		
Fixed the issue that the calculation of Oblique	Dug Fix	
Mercator Projection may not be correct.	Bug Fix	
Fixed the issue of crashing after exporting and	Due Fix	
clicking share.	Bug Fix	
Added millimeter unit setting and optimized	F.1	
the display of drawing in CAD Stakeout.	Enhancement	
Added cross section export format and fixed	Enhancement	
the problem of incorrect display of offsets.	Enhancement	
Fixed the issue that the cut or fill value	D	2.3.2.2
calculated in Line Stakeout may be incorrect.	Bug Fix	
Fixed crash when searching for staking points	Dug Fix	
and inability to select search results.	Bug Fix	
Optimized the display of Spanish language.	Bug Fix	
Added the import of LandXML, KML, KMZ	Enhancement	2220
vector maps.	Enhancement	2.3.2.0
· · · · · · · · · · · · · · · · · · ·		

Added support for importing LandXML triangle network and selecting points to create a plane or triangle network in Surface Stakeout. Added support for importing LandXML alignment in Road Stakeout. Added point name increment setting in Survey. Enhancement Added the code display setting in Survey. Enhancement Enhancement Enhancement Added staking by nearby for polylines and arcs. Enhancement Added support for 3dpolyline in CAD Stakeout. Enhancement Added the output of code in RW5 export. Enhancement Enhancement inputting angle value in Tools. Adjusted the order of the project list display, sorted by the recent open time. Added the display of release note when receiving update. Added the configuration of whether to apply RTCM1021-1027 to the current project CRS. Updated Russian, Polish, Dutch and Turkish. Enhancement Enhancement Coordinate system. Fixed the US predefined coordinate system. Enhancement
or triangle network in Surface Stakeout. Added support for importing LandXML alignment in Road Stakeout. Added point name increment setting in Survey. Enhancement Added the code display setting in Survey. Enhancement Added staking by nearby for polylines and arcs. Enhancement Added support for 3dpolyline in CAD Stakeout. Enhancement Added the output of code in RW5 export. Enhancement Added the function of switching format when inputting angle value in Tools. Adjusted the order of the project list display, sorted by the recent open time. Added the display of release note when receiving update. Added the configuration of whether to apply RTCM1021-1027 to the current project CRS. Updated Russian, Polish, Dutch and Turkish. Enhancement Added Cambodia, Estonia predefined coordinate system. Fixed the US predefined coordinate system. Enhancement Optimized the performance of vector map loading.
Added support for importing LandXML alignment in Road Stakeout. Added point name increment setting in Survey. Enhancement Added the code display setting in Survey. Enhancement Added staking by nearby for polylines and arcs. Added support for 3dpolyline in CAD Stakeout. Enhancement Added the output of code in RW5 export. Enhancement Added the function of switching format when inputting angle value in Tools. Adjusted the order of the project list display, sorted by the recent open time. Added the display of release note when receiving update. Added the configuration of whether to apply RTCM1021-1027 to the current project CRS. Updated Russian, Polish, Dutch and Turkish. Enhancement Added Cambodia, Estonia predefined coordinate system. Fixed the US predefined coordinate system. Enhancement Bug Fix

loading. Bug Fix
loading.
Fixed the issue in Android 11 where Bluetooth
scanning could fail without location services Bug Fix
turned on.
Fixed the issue that the antenna type may be
empty and the issue that the elevation may be

wrong after editing the point when connecting		
to David.		
Fixed the issue that when the Survey with		
confirmation is not turned on, the stake point		
may not be stored in line stakeout, the		
antenna parameters may be displayed	Bug Fix	
incorrectly in point detail and the PPK survey		
may repeat the collection point.		
Fixed the issue that the offset may be	Bug Fix	
displayed as negative in Point Stakeout.	bug rix	
Solved the problem of incorrect filling and		
cutting value calculated beyond the line range	Bug Fix	
in Line Stakeout.		
Fixed the issue that the calculation of France	Bug Fix	
gsb format grid is incorrect.	Dug I IX	
Added a progress bar when refreshing the	Bug Fix	
database to avoid app crashes.	Dug i ix	
Added the horizontal display mode for TC40.	Enhancement	
Added Code module, and added the function		
of selecting code to switch point survey and	Enhancement	
line survey in Survey interface.		
Added the tilt entrance in Survey interface.	Enhancement	
Added the function of selecting staking points	Enhancement	2.3.1.0
to stake in CAD Stakeout.	Limancement	2.3.1.0
Added the function of switching three RTK	Enhancement	
working modes.	Lillancement	
Added RW5 export.	Enhancement	
Added Indonesia predefined CRS.	Enhancement	
Fixed the issue that the result may be wrong	Bug Fix	

after multiple Base Shift calculation and application.		
Solved the problem of frequently prompted Invalid Geoid/Grid.	Bug Fix	
Fixed the issue that there may be bias in some low-resolution Geoid/Grid calculations.	Bug Fix	
Fixed the issue that the Tilt Angle was displayed as negative when the tilt angle exceeded 90° .	Bug Fix	
Fixed the issue that exporting the staking points using custom fields may cause a crash.	Bug Fix	
Added the function of taking a photo in survey confirmation box.	Enhancement	
Added the function of offset in line stakeout.	Enhancement	
Added the function of displaying the list of the nodes after selecting the line in CAD stakeout.	Enhancement	
Added the configuration of static IP in WIFI configuration when connecting to Oscar.	Enhancement	
Added the function of TCP push in NMEA output when connecting to Oscar.	Enhancement	2.3.0.0
Added the display of correction data format when connecting to Oscar.	Enhancement	2.3.0.0
Added South Africa HTML export format.	Enhancement	
Added the option of whether to export height value when exporting DXF file.	Enhancement	
Added x-y-h and y-x-h coordinate display type.	Enhancement	
Added Denmark predefined coordinate system	Enhancement	
Added Qatar predefined coordinate system.	Enhancement	
Added Slovak predefined coordinate system.	Enhancement	

Added support for gsb format Plan Grid files.	Enhancement	
Optimized the log records.	Bug Fix	
Optimized the calculation of plane grid and	Bug Fix	
geoid, added offset value check.		
Optimized the survey database storage logic.	Bug Fix	
Fixed the issue that DD:MM:SS in exporting csv	Dug Fin	
files may not show correctly in excel.	Bug Fix	
Optimized the application of RTCM1021-1027.	Bug Fix	
Optimized the display of Russian language.	Bug Fix	
Added the function of importing data between		
the point lists of Survey Point, Control Point or	Enhancement	
Staking Point.		
Added the function of saving the coordinates		
of the base to the point list in the manually	Enhancement	
base mode.		
Optimized the display of icons and texts in	-	
Survey interface.	Enhancement	
Optimized the interaction of code input and		
displayed the code list in the survey	Enhancement	
confirmation box.		2.2.9.0
Added the configuration of Auto Center during	Enhancement	
survey in the Survey Config.	Enhancement	
Added the option of closing and non-closing	Enhancement	
when complete the line work in survey.	Limancement	
Added the function to stake the nearest point	Enhancement	
in the Point Stakeout module.	Liniancement	
Added the display of dx dy dz to the target in		
staking confirmation box, using different colors	Enhancement	
according to whether exceed the tolerence.		

Added the configuration of Auto zoom during	Enhancement	
stakeout in the Survey Config.		
Added the calculation and display of the		
Remain miles in the Line Stakeout and Road	Enhancement	
Stakeout.		
Added the data export of cross-section in Road	Enhancement	
Stakeout.	Emiancement	
Added the configuration for Auto in Cutoff	Enhancement	
Angle setting when connecting to Oscar.	Enhancement	
Added Wifi Setting when connecting to Oscar.	Enhancement	
Added Lock device setting when connecting to	Enhancement	
Oscar.	Emancement	
Added the reminder of Oscar expiration time.	Enhancement	
Added Malaysia predefined coordinate system.	Enhancement	
Added Romania predefined coordinate system.	Enhancement	
Added Finland predefined coordinate system.	Enhancement	
Added Salvador predefined coordinate system.	Enhancement	
Modified the Column Header is checked by		
default in Export, and displayed the column	Enhancement	
header according to language setting.		
Added the function of Oscar firmware version	Enhancement	
check.	Emiancement	
Added the selection of control point survey		
type.	Enhancement	
Added PPK auto survey.	Enhancement	2.2.8.0
Optimized the interaction of point selection in	Enhancement	
Point Stakeout.	Limancement	
Optimized the interaction of file opening in	Enhancement	
CAD Stakeout.	Limancement	

Optimized the rules of point selection rules in		
Earthwork.	Enhancement	
Optimized the saving logic of points in		
Parameters and Point correction.	Enhancement	
	Falsassassas	
Added the Encode selection in Import.	Enhancement	
Optimized the solution of RTCM1021-1027	Enhancement	
parameters.		
Added Polish display.	Enhancement	
Updated Vietnamese display.	Enhancement	
Fixed the problem that points import in BLH	D	
format may fail.	Bug Fix	
Fixed the problem that preview function in	:	
Import may fail.	Bug Fix	
Fixed the problem that importing illegal grid		
files may cause a crash.	Bug Fix	
Fixed the problem that antenna type may fail		
to read when connecting to David.	Bug Fix	
Fixed the problem of point name deleting in		
the text survey interface.	Bug Fix	
Fixed the problem that the stakeout indication		
may be offset when the map rotation opening.	Bug Fix	
Fixed the problem that the data may not be		
refreshed in Line Stakeout.	Bug Fix	
Fixed the problem that closing layers may not	5 5:	
be successful in CAD Stakeout.	Bug Fix	
Fixed the problem that setting antenna height	D. o Fin	
may not be successful in Static Survey.	Bug Fix	
Added predefined coordinate system of South	Enhance	2272
Africa, Peru, Oman, Libya.	Enhancement	2.2.7.0
	•	•

	· · · · · · · · · · · · · · · · · · ·	
Added the function of setting the repeat count	Enhancement	
after each RTK Reset, and the saving of each	Enhancement	
result in the control point survey mode.		
Increased the maximum number of code	Enhancement	
characters to 30.		
Allowed swithing staking point by directly click	Enhancement	
it on the map when staking points.	Emancement	
Increased the function of cross-section	Faboracas	
stakeout in the road stakeout module.	Enhancement	
Optimized the logic of road stakeout by		
interval and by nearest in the road stakeout	Enhancement	
module.		
Increased the search function when selecting		
points in Parameters Calculation, Point	Enhancement	
correction and Base Shift.		
Added the map view when selecting the point		
library in COGO and other functions.	Enhancement	
Added Points average calculation tool.	Enhancement	
Fixed the problem of new project failure when	D . F.	
selecting some coordinate systems.	Bug Fix	
Fixed the problem of the incorrect stakeout		
prompt when selecting South African	Bug Fix	
coordinate systems.		
Fixed the problem that the default name of		
stake point may not be automatically stepped	Bug Fix	
in the stakeout function.		
Fixed a possible error in the calculation of road		
intersection method.	Bug Fix	
Fixed the problem that the stake point will	Bug Fix	
	1	<u> </u>

incorrectly be added to the point libarary in		
the area stakeout module.		
Fixed the problem of incomplete display of		
some information in the interface of Bluetooth	Bug Fix	
pairing and location information.		
Added the mouse selection tool, the explode		
tool, the background switching function, and	Enhancement	
optimized the button display in the CAD	Enhancement	
stakeout module.		
Added the graphical display of the filling and		
cutting instructions in the surface stakeout.	Enhancement	
Added the function of entering the point name		
to select the point when add a stakeout line or	Enhancement	
in COGO.		
Added Oscar host network module status	Faboracas	
display.	Enhancement	
Added Oscar host language setting.	Enhancement	2.2.6.0
After selecting the coordinate system when		2.2.6.0
creating a new project , added the step of	Enhancement	
confirming the coordinate parameters.		
Added line segmentation tool.	Enhancement	
Added Peru predefined coordinate system and	Ful- and a section of	
added Vietnamese language.	Enhancement	
Solved the problem that the road intersection	Dug Fiv	
method may be calculated incorrectly.	Bug Fix	
Solved the problem that the six parameters of		
height parameters fitting may be calculated	Dug Fiv	
incorrectly and saved with insufficient	Bug Fix	
accuracy.		

Optimized the QR code of project parameters		
sharing, solved the problem of failure of	Bug Fix	
scanning QR code.		
Optimized the display of Turkish language	Bug Fix	
Added CAD Stakeout module.	Enhancement	
Added Area Stakeout module.	Enhancement	
Added the function of keeping the base mode	- Francous ant	
after reboot in manual start base.	Enhancement	
Added the function of keeping coordinates	Enhancement	
after reboot in auto start base.	Enhancement	
Added some customization requirements.	Enhancement	
Fixed the problem that the intersection		
method may be incorrectly calculated and	Bug Fix	2.2.5.0
plotted when using some road data.		2.2.3.0
Optimized the rule of reading files when	D . 5'	
importing data.	Bug Fix	
Fixed the problem that file sharing through		
wechat and other tools may fail after data	Bug Fix	
export.		
Modified the default projection of CGCS2000,		
BJ54 predefined coordinate system to 3-degree	Bug Fix	
zone.		
Added Israel predefined coordinate system.	Enhancement	
Optimized the text display of DXF base map.	Enhancement	
Added the function of setting unit when	Enhancement	
importing and exporting DXF.	Enhancement	2.2.4.0
Increased the import and export of txt format.	Enhancement	
Added survey configuration saving logic.	Enhancement	
Added support for Rinex 3.04 when connecting	Enhancement	

to Oscar.		
Added Stop and Go function when connecting		
to Oscar.	Enhancement	
Added the function of clearing disk and the	- Francous ant	
function of debug configuration when	Enhancement	
connecting Oscar.		
Solved the problem of startup crash caused by		
failing to obtain permissions when installing	Bug Fix	
software on some Android 8 and 10 phones		
Solved the problem of crash when using some		
functions on some Android 10 and 11 cell	Bug Fix	
phones.		
Fixed the problem of detail point survey	D . F:	
program on the text survey interface.	Bug Fix	
Fixed the display issues in the survey program		
due to the display configuration.	Bug Fix	
Fixed the problem that the positioning icon of		
the stakeout interface is shifted under some		
display resolutions, and optimize the display of	Bug Fix	
release interface and release prompt sound.		
Fixed the problem of incorrect calculation of		
the target point in road stakeout after applying	Bug Fix	
base shift.	-0	
Fixed the problem of possible jamming when		
	Bug Fix	
adding antennas.		
Added building polyline, arc and circle for line	Enhancement	
stakeout.		2.2.3.0
Added funtion of selecting a line for stakeout	Enhancement	
on the DXF base map, optimized function of $% \left\{ 1,2,\ldots ,n\right\}$	-	

selecting the point for stakeout.		
Added Grid to Ground tool.	Enhancement	
Added road stakeout real-time mileage		
stakeout, optimized the offset display.	Enhancement	
Added control point survey mode.	Enhancement	
Added Traditional Chinese language option.	Enhancement	
Added Gauss 3-Degree Zone projection.	Enhancement	
Added Columbia Medellin predefined		
coordinate system, France RGF93 Lambert-93	Enhancement	
predefined coordinate system.		
Added support of modifying pole height in	F.1	
tilt-on state.	Enhancement	
Fixed the issue that the registration status	Due Fiv	
displayed for David may be incorrect.	Bug Fix	
Fixed the issue that importing data of ECEF	Dug Eiv	
coordinates may fail.	Bug Fix	
Added length unit support of US feet.	Enhancement	
When creating a new project, added the	Enhancement	
selection portal of plane grid and geoid.	Ennancement	
Added support for Ireland 35 parameter		
conversion model, add Ireland geoid of gri	Enhancement	
format.		
Added support for French geoid of MNT		2.2.2.0
format.	Enhancement	
Added the predefined coordinate system of	Enhancement	
Philippines.	Enhancement	
During connecting with David, added the		
function of decoding and applying	Enhancement	
RTCM1021/1023/1025 when receiving CORS		
	•	•

Added function of getting the nearest point and its mileage on the design road when staking a road. Optimized the application after unit setting, effective for import and export and other functions. Optimized the processing of the deviation between the device positioning and the central meridian of the project, it will no longer correct the central meridian automatically, but ask whether to jump to the project parameters interface for manual correct. Optimized the interaction of the stakeout interface, it automatically obtains 5Hz position data refresh frequency when entering stakeout interface. Solved the issue that David may crash when connected by USB in the previous version. Added photo taking function after point measurement. Added QR code sharing function for survey point.	data through the controller network.

	Added the display form of ENh coordinate.	Enhancement	

Added simulation assessting for the		
Added simulation connection function.	Enhancement	
Added the function of registration by scanning	Enhancement	
code.		
Added function of setting satellite system.	Enhancement	
Added Oscar log download function and	Figh an assument	
battery change mode setting.	Enhancement	
Added function of automatically connect Oscar	F-1	
when starting software.	Enhancement	
Added Oscar internal radio call sign setting		
function.	Enhancement	
Added differential delay threshold limit.	Enhancement	
Added display of 2D/3D error in the whole	Enhancement	
interface.	Ennancement	
Added earthwork calculation tool.	Enhancement	
Added anglular bisector calculation tool.	Enhancement	
Corrected Sweden predefined coordinate	5.	
system.	Bug Fix	
Optimized GSF geoid support.	Bug Fix	
Optimized French resources.	Bug Fix	
Fixed the problem that the coordinates are not	5 5:	
refreshed in time between start and stop.	Bug Fix	
Added David30 device support.	Enhancement	
Added Swedish predefined coordinate system.	Enhancement	
Added notice of installing the radio antenna		
when starting up the Oscar internal radio base	Enhancement	
mode.		2.2.0.0
Fixed the occasional delay in coordinates		
refreshing when connecting with Oscar.	Bug Fix	
Updated the display of modulation when	Bug Fix	

	T	1
setting the Oscar internal radio mode.		
Fixed the issue that getting the central		
meridian by clicking the button and getting the	Bug Fix	
central meridian automatically when		
connecting the device are logically different.		
Added the predefined coordinate system of	Enhancement	
Tianjin 2000.	Limancement	
Added the predefined coordinate system of		
Netherlands RDNAP2008, and support for the	Fabousset	
ASCII format horizontal grid and vertical grid	Enhancement	
under this coordinate system.		
Added the projection parameter setting, the		
button that the central meridian is	Enhancement	
automatically obtained according to the	Enhancement	
current position.		
Added the function of survey point editing,		
allowing to modify the point name and	Enhancement	
antenna information of the measured point.		2.1.10.0
Added the function of checking coordinates via		
road mileage.	Enhancement	
Added the display of modulation type and		
channel bandwidth when connecting to Oscar	Enhancement	
and using the internal radio.		
Added the network link of TCS protocol when		
connecting with David.	Enhancement	
Added the display of the distance from the	Education	
previous survey point in the survey interface.	Enhancement	
Added the display of stakeout collection points	Enhancement	
in the stakeout interface.	Enhancement	
	· · · · · · · · · · · · · · · · · · ·	

When staking out the line to the vertical point, if the vertical point is on the extension line, added the drawing display of the extension line.	Enhancement	
When staking out the line to the stake point, added the memory of stake number, and re-enter line stakeout will continue stakeout according to the stake number before exiting.	Enhancement	
Fixed the problem that the antenna type is empty in the survey configuration after Oscar is connected via NFC when the software is not started.	Bug Fix	
Fixed the problem that it will stuck in the startup for a long time if there is a network problem when starting the PDA Network working mode.	Bug Fix	
Added data editing for cross section, super elevation, and widening of road module and side stakeout function for road stakeout module.	Enhancement	
Added the display of vertical point or stake point mileage during line stakeout.	Enhancement	
Added the distinguishing display of positive and negative offset during line stakeout.	Enhancement	2.1.9.0
Added the predefined coordinate system of Xi'an 80.	Enhancement	
Fixed the crash problem after connecting to Oscar, turning on the static recording and quickly starting the rover radio mode.	Bug Fix	

Fixed the crash problem when importing illegal csv files.	Bug Fix	
Fixed the lagging problem when there are too many points in the Survey interface.	Bug Fix	
Fixed the problem that when the threshold of point stakeout is set too large, clicking the full image to display will lead a crash.	Bug Fix	
Fixed the problem that the software still displays the coordinate and solution status in the last second of the search when the satellite is not searching suddenly.	Bug Fix	
Fixed the problem that the offset may be calculated incorrectly during the line stakeout.	Bug Fix	
Fixed the problem that the central meridian is reset to 0 in Spanish mode.	Bug Fix	
Fixed the problem that garbled characters are displayed when opening the exported csv file in Office Excel by default in Chinese mode.	Bug Fix	
Added support for Stations Equation, Vertical Profiles and Start Mileage in the road function, and road stakeout performs three-dimensional stakeout of center stake.	Enhancement	2180
Added support for export in DXF format whose name or code contains Chinese characters.	Enhancement	2.1.8.0
Modified the predefined coordinate system of Turkey.	Bug Fix	
Road management and road stakeout are added to the software. The current version supports the editing of Alignment by	Enhancement	2.1.7.0

intersection method and element method,		
conversion of intersection method to element		
method, and road stake out function. Other		
functions will be implemented in subsequent		
versions.		
Added Survey with confirmation button to the		
survey configuration. After turning if off, the	Enhancement	
survey point data will be saved directly without	Enhancement	
confirmation box.		
Added the display of QZSS satellites in the sky	Falancia	
map and satellite table.	Enhancement	
Software optimization: retain the user's		
common configuration habits; SNR is adjusted	Enhancement	
to CNO; Portuguese pre-defined coordinate	Enhancement	
system name adjustment.		
Fixed the crash issue of clicking the offset point		
tool to enter the point library to select the	Bug Fix	
point when the project is not opened.		
Fixed the crash issue of switching to Turkish to	5 5:	
perform point survey.	Bug Fix	
The Chinese version of the software is		
renamed to "Tianshuo Measurement", and the	Enhancement	
Chinese display is optimized in the software.		
Added the function of rotating the map view		
when staking out, check this function in the	Enhancement	2.1.6.0
display config interface of staking out.		
Added the function of importing points to the		
survey point library from coordinate files; add	Enhancement	
the function of importing points to the control		

point library or the stakeout point library from		
DXF, SHP, SIMA files.		
Added the L value negative input and calculation in the offset point from line tool.	Enhancement	
Optimized Bulgarian display.	Enhancement	
Fixed the problem that the software automatic		
calculates the UTM number incorrectly when it	Bug Fix	
is located in the Western Hemisphere.		
Fixed the problem that mtext is not displayed	D . F.	
when importing some DXF basemaps.	Bug Fix	
Fixed the problem that prompy might not be		
correct when selecting forward and backward	Bug Fix	
stakeout prompt type.		
Fixed the problem that when the tilt function is		
turned on, the rover mode is stopped and the	Bug Fix	
coordinates are no longer refreshed.		
Support DXF import as the base map, and add		
function of selecting points on the DXF base	Enhancement	
map to the staking point library.		
Add the export of the collected line when	Enhancement	
exporting DXF.	Emancement	
Support SIMA format import with empty		
elevation data, add the encoding setting when	Enhancement	2.1.5.0
selecting SIMA import and export, to avoid the	Zimanocincin	
situation of garble code.		
When connecting with Oscar, it can be chosen		
to shut down the Oscar receiver at the same	Enhancement	
time when exiting Nuwa app.		
When configuring David at base mode, add the	Enhancement	

'save config' statement.		
When performing point stakeout and line		
stakeout, add the search function for staking	Enhancement	
point and staking line.		
Add the checkbox 'Display All Staking Point' in		
the display config of the point stakeout	Enhancement	
interface.		
Adjust part of the statement display for	Enhancement	
English, Chinese, Japanese, and Greek.	Enhancement	
Add predefined Mexican coordinate system.	Enhancement	
Solve the crash of selecting empty project as		
the source project if there is no project in the	Bug Fix	
арр.		
Added Bulgarian displayed.	Enhancement	
Added Irish pre-defined coordinate systems.	Enhancement	
Fixed the problem of low success rate of David	Dug Eiv	
connection.	Bug Fix	
Fixed a crash of the tilt enable button when		
connecting with Oscar Ultimate, if the Android	Bug Fix	
phones do not support GIF view.		2.1.4.0
Fixed the problem that when connecting Oscar		2.1.4.0
Ultimate and turning on the tilt enable, and	Dug Fiv	
then switching to connect David, the tilt	Bug Fix	
button was still on.		
Fixed the crash of clicking the confirm button		
on ths soft keyboard on TC20 after modifying	Bug Fix	
the point name in stakeout.		
Added tilting initialization instructions,	Enhancement	2.1.3.0
optimize tilting interaction, and add tilting	Liniancement	2.1.3.0

	1
initialization, measurement and lofting	
instructions in user manual.	
Added Malaysia RSO projection.	Enhancement
Added Offset Point From Line in the Offset	
Point tool, to determine the Point on the	Enhancement
extension Line or the Point after Offset on the	Emancement
extension Line.	
Added the elevation difference, slope ratio and	
so on the calculation results in the Azimuth	Enhancement
Distance tool.	
Added the Greek display in Nuwa.	Enhancement
Added Slovenia predefined coordinate system.	Enhancement
Added Morocco predefined coordinate system.	Enhancement
Added Belgium predefined coordinate system.	Enhancement
Added Netherlands predefined coordinate	Enhancement
system.	Emandement
Added Guatemala predefined coordinate	Enhancement
system.	Emancement
Added Columbia predefined coordinate	Enhancement
system.	
Added Austria predefined coordinate system.	Enhancement
Solved the problem that when connecting with	
David, the parameters of compass could not be	Bug Fix
read, and the stakeout indicating arrow was	Dag : M
invalid.	
Solved the problem that the DXF file exported	Bug Fix
by Nuwa may can't be imported into autocad.	
Solved the problem that coordinates may not	Bug Fix
be refreshed after tilt off.	

Fixed the problem of parameter calculation or		
point correction, in which the error details of	Bug Fix	
each pair of points cannot be seen.		
Optimized Japanese display.	Bug Fix	
Optimized Spanish display.	Bug Fix	
The input control is optimized. A one-click		
clear button is added to the input box. The		
latitude and longitude input box supports	Enhancement	
intelligent input and real-time format		
switching.		
Added CGCS2000 predefined default		
coordinate system.	Enhancement	
In the connection interface the Bluetooth		
name and MAC address display in newline.	Enhancement	
When connecting Oscar receiver and setting		
the base station mode, added CMR and RTD	Enhancement	
differential formats.		2400
When connecting Oscar receiver and setting		2.1.0.9
static, added configuration record duration,	Enhancement	
and add recorded duration display.		
When connecting Oscar receiver and setting		
the built-in network base station mode, added	Enhancement	
Ntrip protocol support.		
When connecting Oscar receiver, added NMEA	Enhancement	
serial output configuration.	Enhancement	
When connecting Oscar receiver, added disk	Enhancement	
usage display and remaining capacity display.	Enhancement	
Added heading display when connected to	Enhancement	
David plus.	Liniancement	

Adjusted the size of the point name on the		
Survey interface.	Enhancement	
Added SHP basemap import function.	Enhancement	
Added satellite map display on the online map	Enhancement	
of Survey interface.	Emancement	
Added the function of stakeout to the vertical	Enhancement	
point on the line for Line stakeout.	Limancement	
Modified the point type of the collection point		
during stakeout to "Stakeout collection point"		
to distinguish it from general Detail points and	Enhancement	
added the property of distance from the target		
point.		
Fixed the problem of using the layer name as	Bug Fix	
the point name in other import - DXF import.	208.11	
Fixed other import - SHP import failure issues.	Bug Fix	
Fixed the problem of low success rate of NFC	Bug Fix	
connection.	208.11	
Fixed the problem of displaying registration		
information error when connecting	Bug Fix	
unregistered Oscar receivers.		
Fixed the problem that the base coordinates of		
the collection point are incorrect when	Bug Fix	
switching between network 1 + 1 mode and		
VRS mode.		
Organized Chinese and Japanese translations	Bug Fix	
in the app.		
Added the function of the plane grid.	Enhancement	
Added the support of GRD, GSF, OSGB plane grid or geoid.	Enhancement	2.1.0.8
griu or georu.		

Added the function of online download plane grid or geoid.	Enhancement	
Added the import and export of SIMA format	Enhancement	
files.		
When inputting the repeated line name to		
continue the Linework measurement, it is	Enhancement	
supported to choose from the start point or	Limancement	
the end point.		
Redo the line stakeout function. Stakeout to		
the point on the line according to the interval	Enhancement	
and the offset.		
Added the report file function in detail point		
survey, turn on the function and the	Enhancement	
coordinate of every epoch will be saved into	Limancement	
a .txt file.		
Added the display of L5 SNR.	Enhancement	
Added button to cancel the display of	F-1	
electronic bubble.	Enhancement	
Added the stakeout pointing arrow text	Enhancement	
description.	Enhancement	
Solved the crash problem when opening the		
Survey interface on some phones with higher	Bug Fix	
display resolution.		
The height value in the location share function		
is calculated to the coordinates of ground	Pug Eiv	
points according to the antenna settings in	Bug Fix	
Nuwa.		
Added Molodensky Badekas datum transform	Enhanceres	2406
model.	Enhancement	2.1.0.6
	•	

Added Singapore predifined coordinate system		
SVY21.	Enhancement	
Added Australia predifined coordinate system		
GDA2020.	Enhancement	
Optimized the Survey interface, the survey		
button will change automatically and the		
survey configuration will change according to	Enhancement	
the selection of Survey Mode(Detail or		
Continous).		
Optimized the Survey Config interface, the		
HRMS limited value and VRMS limited value	Enhancement	
will change according to the Solution Limited.		
Display optimization of the Survey Config		
interface. The Config in the Survey and the		
Stakeout function module only displays	Enhancement	
relevant items; all configuration items are		
retained in the Survey Config.		
Adjusted the longitude and latitude		
coordinates display, put N, S, E, W after the	Enhancement	
number.		
Opened to use TCS through PDA Network in		
Oscar base configuration.	Enhancement	
Added the function of Oscar registration by		
Nuwa.	Enhancement	
Added the limit to 5 survey points when		
connecting to general instruments of NMEA	Enhancement	
mode.		
Corrected some translation errors in English		
language.	Bug Fix	

Solved the problem that sometimes the		
number of satellites used is larger than the	Bug Fix	
number of visible satellites.		
Solved the problem of software exception if		
click Device Info during NFC connection.	Bug Fix	
Solved the problem of Nuwa software crash		
when connecting Oscar via NFC, if Nuwa is not	Bug Fix	
provided system permission.		
Solved the problem in XML export that the		
solution state of all survey points are fixed.	Bug Fix	
Solved the problem when repeated using the		
baseshift, the value of Base shift and the actual	Bug Fix	
coordinate shift are not the same.		
Solved the problem that the survey points in		
the Survey interface may not be displayed	Bug Fix	
when the Survey Style is Detail.		
Solved the problem that the point cannot be		
selected to stakeout when importing NE points	Bug Fix	
to the Stakeout point library.		
Solved the problem of Nuwa crash for some	Bug Fix	
android 9.0 models.	Dug I IX	
Adjusted the display of Tilt Angle quality, Tilt		
direction quality and Heading quality in tilt	Bug Fix	
measurement.		
Adjusted the algorithm for calculating the		
Distance to base, the incorrect result can be		
avoided by calculating according to the XYZ	Bug Fix	
coordinate in the case of projection		
unselected.		

Changed the tone frequency of stakeout prompt distance(long) from 5s to 2s at a time.	Bug Fix	
Fixed the crash when connecting devices using	Bug Fix	
Android 9 caused by the API level change.		
Fixed the problems that Nuwa is unable to		
obtain HTTP permissions using Android 9		2.1.0.5
caused by the API level change, including	Bug Fix	
inablity to perform software automatic update		
and online map display.		
Added moving direction indicator arrow in	Embanas ment	
stakeout interface.	Enhancement	
Added the circle display whose radius is equal		
to the prompt tone distance in stakeout	Enhancement	
interface.		
The prompt tone in different grades in		
stakeout interface. When the surveyor is		
approaching to the point to stake out, Nuwa	Enhancement	
beeps every 5 seconds. When the surveyor	Emancement	
arrives at the point to stake out, Nuwa beeps		2.1.0.3
every 1 second.		2.1.0.3
Added the XML format export which supports		
being imported to EZSurv to post process	Enhancement	
Stop&Go data.		
Adjusted DXF export, add height coordinate		
and height annotation. Distinguish layers	Enhancement	
according to different kinds of annotations and		
point feature property.		
Added GNSS Linework function. The survey	Enhancement	
line will be displayed in survey interface. The		

survey line allows operations such as delete		
point, insert point, and continue surveying.		
Change the API level to 28 and re-launch on	Dura Sin	
Google Play.	Bug Fix	
Fixed the issue that the point coordinate saved		
to the Point database may be wrong in the	Bug Fix	
case of the Base Shift.		
Fixed incomplete import Stakeout Point	D 5'	
selecting all from Survey Point.	Bug Fix	
Fixed the crash issue when turning on location	D . F.	
share function for some android devices.	Bug Fix	
Tilt compensation function is available for	Fr.hanaamant	
Oscar Ultimate model.	Enhancement	
Added elevation stakeout for point stakeout	Full and a support	
and line stakeout.	Enhancement	
Opened the TCP Client function for the	Enhancement	
receiver network.	Emancement	
Solved the problem that conversion from NEh		
to BLH may be incorrect when there are seven	Bug Fix	
parameters.		2.0.1.6
Solved the problem that selecting the		2.0.1.0
coordinate system from the Coord System List	Bug Fix	
is not effective when editing the project	bug rix	
parameters.		
Solved the crash problem caused by the name		
containing illegal characters when creating a	Bug Fix	
new project.		
After setting the latitude and longitude format	Bug Fix	
to DD:MM.MMM, the number of decimal		

places is changed to 7 digits.		
Solved the problem that the link and		
differential delay are not displayed on the	Bug Fix	
survey interface when Oscar is set as the		
receiver network rover mode.		
Solved the problem that the debug button in		
the device info interface sometimes is opened		
illegally when switching from connecting David	Bug Fix	
to connecting Oscar.		
Corrected the English expression of the		
altitude and geodetic height on the survey	Bug Fix	
interface.		
Corrected the English expression of long press		
to cancel the Bluetooth match on the	Bug Fix	
connection interface.		
The display of base point coordinates is		
changed to ground when base antenna height	Enhancement	
is obtained.		
The display of north / east direction STD is		
added to the survey point attribute which is	Enhancement	
allowed to be exported.		
During the point survey process, it is allowed		
to stop the survey by pressing the stop button.	Enhancement	2.0.1.4
Fixed the issue that after configuring David by		
Nuwa to stop the base mode, restarting David	Bug Fix	
it still displays as Base.		
Fixed the probabilistic crash issue of returning		
to the main interface after completing the	Bug Fix	
point staking.		

Open Oscar Reset function	Enhancement	
The Collection End time of points in the point		
library will change with the software time zone	Enhancement	
setting		
The project list is arranged in reverse	Enhancement	
chronological order by edit time	Enhancement	
Fixed crash caused by choosing an empty	Due Fix	
coordinate system	Bug Fix	
Fixed the probabilistic crash in NFC connection	Bug Fix	
Fixed the probabilistic crash of setting Ntrip	Bug Fix	
server after Oscar connection	Bug IIX	
Fixed failure of setting up TCPClient in	Bug Fix	
connecting David	bugin	2.0.1.2
Solved the problem that modifying antenna		2.0.1.2
parameters does not take effect after the	Bug Fix	
survey of smooth points is completed		
Solved the problem that Base points would not	Bug Fix	
increase after reaching 9	Bug I IX	
Fixed HTML export crash when there are	Bug Fix	
stakepoints	Bug Tix	
Solved the problem that the export Collection		
End time property has no hour, minute, or	Bug Fix	
second, when the separator is a space in	bugin	
custom export		
Solved the problem that the searched results	Bug Fix	
for the point library based on time is empty	545 TA	
Fix the severe problem that modification of	Bug Fix	2.0.0.9
Ant Height is not effective in the Survey Config		2.0.0.3
Supports new model Oscar	Enhancement	2.0.0.8

Added display of base shift, datum transition,		
plane adjustment and height fitting in the	Enhancement	
interface of Satellite Info - Position		
For data import, it supports data preview	5	
before importing data	Enhancement	
For data export, it added HTML export	Enhancement	
Custom import and export format support	5.1	
editing, viewing and deleting	Enhancement	
Added related tips in the Bluetooth pairing and	Falsa a sant	
device connection interface	Enhancement	
The base supports RTCM3.0 format	Enhancement	
The logic of Detailed Point acquisition is		
modified to pop up confirmation dialogue after	Enhancement	
the acquisition is completed		
Added threshold distance setting for stakeout	Enhancement	
tone	Emancement	
In the survey configuration - Display		
configuration interface, added the check box of	Enhancement	
displaying all stake out points		
Solve the flashback problem of Nuwa in	Bug Fix	
landscape orientation display	Bug I IX	
Unify NEh coordinates and RMS data, retain 4	Bug Fix	
decimal places	Dug I IA	
Solve the application crash caused by the	Bug Fix	
special registration date in the Demo Key	Sug i in	
Solve the problem of incomplete display of	Bug Fix	
part of the Spanish interfaces	DUS I IA	
Solve the problem that the seven parameters	Bug Fix	
and the correction parameters are not	208117	

newly created project Solve the problem of search failure according to time in point library search Solve the problem that exporting the custom interface cannot slide Solve the problem that in the survey interface the speed is not refreshed Adjust default antenna Bug Fix Added Japanese JGD2011 coordinate system Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized online upgrade information prompts Optimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized the seven parameters calculation Enhancement Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement Optimized Survey Config options Enhancement	imported into the project parameters in the		
Solve the problem of search failure according to time in point library search Solve the problem that exporting the custom interface cannot slide Solve the problem that in the survey interface the speed is not refreshed Adjust default antenna Added Japanese JGD2011 coordinate system Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Optimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement Optimized Survey Config options Enhancement	imported into the project parameters in the

Solve the problem that exporting the custom interface cannot slide Solve the problem that in the survey interface the speed is not refreshed Adjust default antenna Added Japanese JGD2011 coordinate system Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized Survey Config options Optimized Survey Config options Optimized the function of adding stakeout prompts Added Ghana's predefined coordinate system Enhancement	Solve the problem of search failure according	Bug Fix	
Interface cannot slide Solve the problem that in the survey interface the speed is not refreshed Adjust default antenna Added Japanese JGD2011 coordinate system Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized online upgrade information prompts Optimized Tools Offset Point calculation Angle calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized Survey Config options Optimized Survey Config options Optimized Survey Config options Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate interaction interaction and control points Added Portuguese predefined coordinate interaction int	to time in point library search		
interface cannot slide Solve the problem that in the survey interface the speed is not refreshed Adjust default antenna Bug Fix Added Japanese JGD2011 coordinate system Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized Survey Config options Enhancement Optimized the seven parameters calculation Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement Added Portuguese predefined coordinate system Enhancement	Solve the problem that exporting the custom	Bug Fix	
the speed is not refreshed Adjust default antenna Bug Fix Added Japanese JGD2011 coordinate system Enhancement Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized Survey Config options Optimized the function of adding stakeout prompts Added Ghana's predefined coordinate system Enhancement	interface cannot slide	248111	
the speed is not refreshed Adjust default antenna Added Japanese JGD2011 coordinate system Enhancement Enhancement Dotimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Dotimized online upgrade information prompts Optimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement Enhancement 1.0.9.5	Solve the problem that in the survey interface	Dug Fiv	
Added Japanese JGD2011 coordinate system Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized the seven parameters calculation Enhancement Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement	the speed is not refreshed	Bug Fix	
Optimized the stakeout prompt message Enhancement Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Enhancement Optimized online upgrade information prompts Optimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Enhancement Optimized the seven parameters calculation Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement Enhancement Enhancement 1.0.9.7	Adjust default antenna	Bug Fix	
Optimized the stakeout prompt message Fixed the problem of wrong name for the Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Optimized online upgrade information prompts Optimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Enhancement Optimized the seven parameters calculation Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement Enhancement 1.0.8.0	Added Japanese JGD2011 coordinate system	Enhancement	1007
Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized the seven parameters calculation Enhancement Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized the stakeout prompt message	Enhancement	1.0.3.7
Portugal coordinate system Fixed the problem of inaccurate acquisition time during the point collection Optimized the SHP export coordinate format Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized the seven parameters calculation Enhancement Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement 1.0.8.0	Fixed the problem of wrong name for the	Dug Fiv	
time during the point collection Optimized the SHP export coordinate format Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized the seven parameters calculation Enhancement Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement 1.0.8.0	Portugal coordinate system	Bug Fix	
time during the point collection Optimized the SHP export coordinate format Optimized online upgrade information prompts Optimized Tools Offset Point calculation Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized the seven parameters calculation Enhancement Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement 1.0.8.0	Fixed the problem of inaccurate acquisition		
Optimized online upgrade information prompts Optimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Enhancement Optimized the seven parameters calculation Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement Enhancement 1.0.8.0	time during the point collection	Bug Fix	
Detimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Enhancement Optimized the seven parameters calculation Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized the SHP export coordinate format	Enhancement	
Optimized Tools Offset Point calculation Enhancement Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Enhancement Optimized the seven parameters calculation Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized online upgrade information		
Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Optimized the seven parameters calculation Optimized Survey Config options Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement 1.0.9.5 Enhancement Enhancement Enhancement 1.0.8.0	prompts	Enhancement	
Optimized Tools Azimuth and Intersection Angle calculation Optimized OSM online map loading Enhancement Optimized the seven parameters calculation Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized Tools Offset Point calculation	Enhancement	
Angle calculation Optimized OSM online map loading Enhancement Optimized the seven parameters calculation Enhancement Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized Tools Azimuth and Intersection		1.0.9.5
Optimized the seven parameters calculation	Angle calculation	Enhancement	
Optimized Survey Config options Enhancement Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized OSM online map loading	Enhancement	
Optimized the function of adding stakeout points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized the seven parameters calculation	Enhancement	
points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized Survey Config options	Enhancement	
points and control points Added Ghana's predefined coordinate system Enhancement Added Portuguese predefined coordinate Enhancement 1.0.8.0	Optimized the function of adding stakeout		
Added Portuguese predefined coordinate Enhancement 1.0.8.0	points and control points	Enhancement	
Enhancement 1.0.8.0	Added Ghana's predefined coordinate system	Enhancement	
	Added Portuguese predefined coordinate		1055
'	system	Enhancement	1.0.8.0

Optimized static storage	Enhancement	
Optimized elevation fitting calculation	Enhancement	
Fixed elevation problems caused by geoid model during data inverse calculation	Bug Fix	
Fixed the flashback issue caused in certain situations	Bug Fix	
Optimize DXF export	Enhancement	
Fixed the problem that the default is the control point library when importing points for stakeout point library	Bug Fix	
Fixed the problem that the interface has no prompt when the stakeout point is approaching the stakeout point library	Bug Fix	
Support collecting points with physical collection button in TC20 controller	Enhancement	
Support quick points collecting in 'point stakeout' and 'line stakeout' with physical collection button	Enhancement	
Add 'survey hotkey' in point survey configuration page	Enhancement	1.0.4.1
Fix average collection problem if the solution can't meet the requirements	Bug Fix	
Change the display of coordinate axis in projection parameters as X->North Y->East	Enhancement	
Optimized the calculation of parameters and the secondary calculation process of point correction	Enhancement	1.0.3.3
Optimized the device connection experience	Enhancement	
Optimized the device registration experience	Enhancement	

Optimized antenna management	Enhancement	
In the survey configuration, the survey epoch	Enhancement	
is changed to be editable by users	Liniancement	
Added Oscar preview in Device Connection, so	Enhancement	
stay tuned!!	Limancement	
Added support for common NMEA devices	Enhancement	
Added the function of automatically zooming		
the scale when approaching the stakeout point	Enhancement	
during point stakeout/line stakeout		
Added multi-point selection function when	Enhancement	
importing stakeout points	Ennancement	
Solved the connection stability of NtripClient	Enhancement	
function under Spanish and other languages	Ennancement	
Added the functions of Device Debug and	Enhancement	
static mutual exclusion	Ennancement	
Fixed the display problem when NtripClient	D Six	
and TCPClient are connected	Bug Fix	1.0.3.2
Modified the GNSS point coordinates displayed	Enhancement	1.0.3.2
in the base shift as BLH	Emancement	
Optimized static record Station ID setting	Enhancement	
function	Emancement	
Fixed crash when switching languages in	Pug Fiv	
Spanish and other languages	Bug Fix	
Combined the mount point and rover		
configuration to solve the problem of the	Enhancement	
display of the mount point history data		
Fixed the problem that the collection time		
epoch does not take effect in the survey	Bug Fix	
configuration		

	T	T
Fixed the problem of not displaying NEh coordinates when manually starting the base station	Bug Fix	
Fixed the problem that the base point cannot be selected in the base shift	Bug Fix	
Fix the stakeout point error on the map and coordinates error after the base shift	Bug Fix	
Fixed the error of multiple repetitive calculations in the base shift	Bug Fix	
Added support for north-south/east-west hemisphere	Enhancement	
Optimize continuous point survey by distance	Enhancement	
Optimize continuous point survey by time	Enhancement	
Add the predefined coordinate systems of Malaysia and Romania	Enhancement	
Add the function of station-id setting during static measurement	Enhancement	
Add the function of Inner RTK control	Enhancement	
Add the function of importing projects	Enhancement	
Add preview function for predefined coordinate system	Enhancement	1.0.2.9
Optimize the arrangement and display of countries or regions in the predefined coordinate systems	Enhancement	
Optimize the display of satellite quantity	Enhancement	
Optimize the display of antenna height interface	Enhancement	
'Connected' at the top of the main interface is changed to 'Connected'	Enhancement	

The position status of satellite interface for		
base station is changed to 'Base Manual' and	Enhancement	
'Base Auto'		
Fix the problem of not displaying NEh		
coordinates when manually starting the base	Bug Fix	
station		
Add new projections: Cassini, Oblique		
Stereographic Alternative, Stereographic, and	Enhancement	
Transverse Cylindrical Equal Area		
Fix the problem of imported line files are not	D	
identified	Bug Fix	
Fix the problem of crashing when creating new		
projects and point survey under Spanish	Bug Fix	
language		
Optimize database upgrade	Enhancement	
Add predefined coordinate system	Enhancement	
Modify the satellite quantity display as	5 5:	
'satellite tracked / satellite used'	Bug Fix	
Optimize the export format of dxf file	Enhancement	
Fix the problem that the elevation increases		
when manually starting the base station	Bug Fix	
Optimize base shift experience	Enhancement	4.0.0
Change shp/dxf export coordinates to local		1.0.2.8
coordinates	Enhancement	
Fix the problem that satellites on the Sat Tab		
interface has always shown true	Bug Fix	
Add differential data format display when	Enhancement	
using Ntrip to obtain source list		
Optimize system stability	Enhancement	

System compatibility is improved, compatible with upgrades on older software Fixed the problem that the antenna height disappeared in the device connection interface after reloading the software Fixed the problem of the invalidity of static survey after canceling auto-start Fixed the problem of the Ntrip Client set up failure for the rover Fixed the problem of the antenna height configuration failure for the rover Optimize the software automatic update experience Optimize the device connections Optimize continuous acquisition by time Add Geoid Model: (1) support EGM96 and EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign the base shift UI			
Fixed the problem that the antenna height disappeared in the device connection interface after reloading the software Fixed the problem of the invalidity of static survey after canceling auto-start Fixed the problem of the Ntrip Client set up failure for the rover Fixed the problem of the antenna height configuration failure for the rover Optimize the software automatic update experience Optimize the device connections Optimize continuous acquisition by time Add Geoid Model: (1) support EGM96 and EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (2) refersion in the southern the southern the southern the southern the southern themisphere Optimize the base shift logic; (4) redesign	System compatibility is improved, compatible	Enhancement

Configuration failure for the rover Optimize the software automatic update experience Optimize the device connections Enhancement Optimize continuous acquisition by time Add Geoid Model: (1) support EGM96 and EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	Fixed the problem of the antenna height		
experience Optimize the device connections Enhancement Optimize continuous acquisition by time Add Geoid Model: (1) support EGM96 and EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	configuration failure for the rover	Bug Fix	
experience Optimize the device connections Enhancement Optimize continuous acquisition by time Add Geoid Model: (1) support EGM96 and EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	Optimize the software automatic update		
Optimize continuous acquisition by time Enhancement 1.0.2.6 EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	experience	Enhancement	
Add Geoid Model: (1) support EGM96 and EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	Optimize the device connections	Enhancement	
EGM08 at the same time; (2) optimize data loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	Optimize continuous acquisition by time	Enhancement	
loading and reduce waiting time for different devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	Add Geoid Model: (1) support EGM96 and		1.0.2.6
devices; (3) simplify algorithm calculation process and save system resources Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	EGM08 at the same time; (2) optimize data		
Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; Enhancement (3) reorganize the base shift logic; (4) redesign	loading and reduce waiting time for different	Enhancement	
Add UTM projection support for the southern hemisphere Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; Enhancement (3) reorganize the base shift logic; (4) redesign	devices; (3) simplify algorithm calculation		
Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	process and save system resources		
Optimize the rules for point acquisition automatic naming Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	Add UTM projection support for the southern	Falancia	
Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	hemisphere	Ennancement	
Optimize the base shift function: (1) support multiple times of base shift; (2) support real-time modification of the shift parameters; Enhancement (3) reorganize the base shift logic; (4) redesign	Optimize the rules for point acquisition	Faboracas	
multiple times of base shift; (2) support real-time modification of the shift parameters; Enhancement (3) reorganize the base shift logic; (4) redesign	automatic naming	Ennancement	
real-time modification of the shift parameters; (3) reorganize the base shift logic; (4) redesign	Optimize the base shift function: (1) support		
(3) reorganize the base shift logic; (4) redesign	multiple times of base shift; (2) support		
	real-time modification of the shift parameters;	Enhancement	
the base shift UI	(3) reorganize the base shift logic; (4) redesign		
	the base shift UI		

Optimize the solution state of the data export, which is the same as the board definition	Enhancement	
Optimize the display of the antenna height when manual-starting the base station	Enhancement	
Repair of other problems	Enhancement	
Antenna height display optimization	Enhancement	
Survey configuration: display configuration optimization	Enhancement	
Re-enter static storage, status optimization	Enhancement	
Static storage antenna optimization when self-starting the base station	Enhancement	
Line stakeout 'distance' distinguishes between positive and negative	Enhancement	
Add column name for coordinate export	Enhancement	
Remove the 'Acquisition Status' of the 'Text Acquisition' interface	Enhancement	1.0.2.4
'Smoothing' and 'Acquisition' are combined	Enhancement	
Ntrip site management: IP address display is incomplete	Bug Fix	
Click base/rover configuration without changing order	Enhancement	
Support for name modification of base/rover configuration User-defined name can be changed, the system default name cannot be changed	Enhancement	
Add reminder when creating a new project	Enhancement	
Change the logic of antenna type choosing, the antenna type must be choosing before connection	Enhancement	1.0.2.3

Change the default antenna height as pole height in surveying, change the default antenna height as slant height in static surveying Support choosing file type in import file Add GPS mock location Fixed the error of configuration when build a new project Optimized the interface freeze if there are too many points in point survey interface Optimized the display of export interface Coptimized the display of the result in two point intersection Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point stakeout Enhancement Enhancement Enhancement Enhancement
antenna height as slant height in static surveying Support choosing file type in import file Add GPS mock location Fixed the error of configuration when build a new project Optimized the interface freeze if there are too many points in point survey interface Optimized the display of export interface Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the option logic in import interface Enhancement Change the voice output frequency in point Enhancement Enhancement Enhancement
Support choosing file type in import file Add GPS mock location Fixed the error of configuration when build a new project Optimized the interface freeze if there are too many points in point survey interface Optimized the display of export interface Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the option logic in import interface Enhancement Change the voice output frequency in point Enhancement Enhancement Enhancement
Support choosing file type in import file Add GPS mock location Fixed the error of configuration when build a new project Optimized the interface freeze if there are too many points in point survey interface Optimized the display of export interface Enhancement Coptimized the display of the result in two point intersection Optimized the display of title bar Coptimized the option logic in import interface Enhancement Enhancement Enhancement Enhancement Change the voice output frequency in point Enhancement
Add GPS mock location Fixed the error of configuration when build a new project Optimized the interface freeze if there are too many points in point survey interface Optimized the display of export interface Enhancement Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point Enhancement Enhancement Enhancement
Fixed the error of configuration when build a Bug Fix Optimized the interface freeze if there are too many points in point survey interface Optimized the display of export interface Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point Enhancement Enhancement
Description of the interface freeze if there are too many points in point survey interface Optimized the display of export interface Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point Enhancement Enhancement Enhancement
Optimized the interface freeze if there are too many points in point survey interface Optimized the display of export interface Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point Enhancement Enhancement Enhancement
Enhancement Optimized the display of export interface Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the display of title bar Optimized the option logic in import interface Enhancement Enhancement Enhancement Enhancement Enhancement
Optimized the display of export interface Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the display of title bar Optimized the option logic in import interface Enhancement Change the voice output frequency in point Enhancement Enhancement
Optimized the display of the result in two point intersection Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point Enhancement Enhancement
Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point Enhancement Enhancement Enhancement
Optimized the display of title bar Optimized the option logic in import interface Change the voice output frequency in point Enhancement
Optimized the option logic in import interface Enhancement Change the voice output frequency in point Enhancement
Change the voice output frequency in point Enhancement
Enhancement
stakeout
Add RTCM1230 message in base model Enhancement
Fixed software crashed when sharing project Bug Fix
Optimized the logic to register David Enhancement
Optimized the device connection Enhancement
Support auto start static mode Enhancement
Add xyz apporoximate in rinex file Enhancement
Optimized the speed to log in CORS. Enhancement
Add point name and code in dxf format Enhancement
Fix the abnormity H value if the antenna slant
height is zero Bug Fix 1.0.2.2
Change the 'Projection' to 'CRS' Enhancement
Change the threshold value in collect points by Enhancement

distance		
Optimized auto collect function by distance	Enhancement	
Optimized software access authority (it need		
location information authority at the same	Enhancement	
time when using Bluetooth if your android		
version is higher than Android 6.0)		
Optimized auto update function	Enhancement	1.0.2.1
Optimized the display of system language	Enhancement	
Optimized many default value	Enhancement	
Optimized the pop-up message when getting	Enhancement	
the first fixed solution	Enhancement	
Optimized the language of pop-up messages	Enhancement	
Fixed the display error in height fitting title	D	
panel	Bug Fix	
Default to open update auto test function	Enhancement	
Fixed software crash due to the display of	Bug Fix	
decimal point in some language		
Optimized the display of project information	Enhancement	
Fixed the bug that the QR code can't refresh	Bug Fix	1.0.2.0
when project parameters changed		
Fixed the title can't be changed with system	Bug Fix	
language changed		
Fixed numeric keypad have no decimal point	Bug Fix	
problem in some cellphone		
Fixed the unusual local coordinate value under	Bug Fix	
some ellipsoid
